ABC's & 123's

Product: Giggles : Computer Funtime For Baby

Company: [Leveractive](#)

3 Great titles - 3 Great ways for baby and toddler to experience the computer in a fun, engaging, and safe manner.

Leveractive has taken the curiosity and exploratory nature of infants and toddlers, captured it, and created a program that is both stimulating and educational.

With every press of a key (any key on the keyboard) fun things will happen and the screen will come to life. As they learn what response happens for their actions, they will begin choosing their favorite areas to go to, but even the very novice baby at 6 months can press a key and have the delight of seeing that action produce the reaction on the screen.

Offering 3 titles, Leveractive currently offers Shapes - ABC's & 123's - and Animal Friends. All three are simply charming and delightful.

At the Leveractive website you will learn detailed information about each title and be able to take a video tour. This is a great way to see just how wonderful these are, as well as how affordable it now is to entertain your infant in a new manner you never before thought possible, at such a young age.

What I like about these software titles is the fact that even the very youngest ones, able to sit on your knee and be interested in such an activity, can explore a whole new world that has not been available to them prior. Not that we want infants hooked on computers, but to have this as an activity you can do together, exploring and engaging in something they learn by is beneficial and allows for that extra moment of bonding in a new manner. Giggles creates an inviting environment for the young, and even us young at heart will enjoy these programs, as we explore them through the eyes of our children. Seeing their excitement only adds to our appreciation for what they will experience through these titles.

The programs are well laid out and offer rich, colorful graphics and a very professional, yet child friendly appearance. Engaging in the programs is easy and truly does only take the touch of the keyboard to start the action.

My Animal Friends offers 14 activities and over 60 songs.
Shapes offers 14 activities and over 50 songs.
ABC's & 123's offers 14 activities and over 50 songs.

- Includes spanish and english versions.
- PC & Mac compatible.
